

Iqraa Wahid

Markham, ON | (416) 937-2985 | iqraa.wahid@torontomu.ca | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

SUMMARY OF QUALIFICATIONS

- Upper-year Computer Engineering student at Toronto Metropolitan University with experience developing software applications, collaborating on engineering projects, and mentoring students
- Strong leadership, communication, teamwork, and organizational skills developed through tutoring, volunteer work, hackathons, and academic projects

TECHNICAL SKILLS

- **Languages:** Java, C, C++, JavaScript (basic), HTML/CSS, MATLAB, VHDL
- **Developer Tools:** Git, GitHub, VS Code, Eclipse, NetBeans, Quartus, KiCad
- **Core Concepts:** Data Structures & Algorithms, Object-Oriented Programming, Software Testing

EDUCATION

Toronto Metropolitan University

Bachelor of Computer Engineering, B. Eng

Toronto, ON

Sept. 2024 - Exp. May 2029

Dean's List (Fall 2025, Winter 2026)

- **Relevant Coursework:** Introduction to Engineering, Algorithms & Data Structures, Advanced Algorithms, Object-Oriented Engineering Analysis & Design, Software Systems, Discrete Mathematics, Computer Programming Fundamentals

PROJECTS

LLM-Assisted Software Engineering Research (SCI 999)

Sept. 2026 – Present

Toronto Metropolitan University | Supervisor: Dr. Glaucia Melo dos Santos

- Investigating how the type and amount of software project context provided to large language models (LLMs) affects the quality of generated code
- Conducting a literature review and developing experiments to compare LLM-generated code across different project-context conditions

Personal Portfolio Website (HTML/CSS/JavaScript)

June 2026 - Present

- Demonstrated initiative by learning HTML, CSS, and JavaScript to build a responsive portfolio
- Added custom navigation, animations, and interactive features to showcase projects and skills

Advanced Algorithms & Data Structures (Java)

May 2026 - June 2026

- Implemented and tested advanced algorithms including BFS/DFS, Prim's MST, cycle detection, strongly connected graphs, N-Queens, knapsack, rod cutting, LIS, Boyer-Moore, and Rabin-Karp

Bookstore Application (Java, GUI)

March 2026

- Collaborated with a 3-member team to develop a Java-based bookstore application featuring book search, rewards tracking, and automated discount calculations
- Applied object-oriented design, debugging, and testing to improve scalability, maintainability, reusability, and functionality

Digital Systems & FPGA Design (VHDL, Quartus)

December 2025

- Designed and implemented a VHDL-based processor with an ALU, FSM, registers, and decoders on FPGA hardware using Quartus

VOLUNTEER

Scratch Programming Tutor, Islamic Society of Markham

August 2026

- Taught Scratch and ScratchJr programming to children ages 4–12 through hands-on projects, developing their programming and problem-solving skills

WORK EXPERIENCE

Coding Tutor (Volunteer/Part-Time), BrightMinds

June 2026 - Present

- Provide mathematics and programming tutoring, adapting explanations to individual needs and independently learning C++ to teach programming fundamentals
