

Iqraa Wahid

Markham, ON | (416) 937-2985 | iqraa.wahid@torontomu.ca | [GitHub](#) | [LinkedIn](#)

SUMMARY OF QUALIFICATIONS

- Computer Engineering student with experience developing software applications using Java, C, C++, and VHDL through academic and personal projects
- Strong object-oriented programming, debugging, and problem-solving skills with a solid foundation in data structures, algorithms, and software design
- Demonstrated ability to learn new technologies through academic projects and hackathon experience quickly
- **Technical Skills:** Java, C, C++, VHDL, Data Structures & Algorithms, Object-Oriented Programming (OOP), Software Testing & Debugging, AI-Assisted Development (Gemini, ChatGPT)

EDUCATION

Toronto Metropolitan University

Bachelor of Computer Engineering, B. Eng

Toronto, ON

Sept. 2024 - Exp. May 2029

CGPA: 3.620 | Dean's List (Fall 2025, Winter 2026)

- **Relevant Coursework:** Algorithms & Data Structures, Advanced Algorithms (*In Progress*), Object-Oriented Engineering Analysis & Design, Software Systems, Discrete Mathematics, Computer Programming Fundamentals

PROJECTS

Bookstore Application (Java, GUI)

March 2026

- Collaborated in a 3-member team to develop a Java-based bookstore application featuring book search, rewards tracking, and automated discount calculations
- Applied object-oriented design patterns and software design patterns to improve scalability, maintainability, and code reusability
- Performed debugging and testing to identify and resolve issues in application functionality

Hackathon Experience (York University)

February 2026

- Collaborated with a 4-member team to develop a thrift-focused web application featuring an interactive Canadian map and AI-powered functionality
- Leveraged GenAI tools (Gemini AI and ChatGPT) to rapidly learn new technologies, troubleshoot challenges, and accelerate development during a 36-hour hackathon

VHDL & FPGA Design (Quartus)

December 2025

- Designed and implemented a VHDL-based processor and validated ALU functionality on an FPGA hardware
- Tested and debugged digital logic components using Quartus development tools
- Applied analytic and problem-solving skills to identify and resolve hardware design issues

Pharmacy Database System (Java)

April 2023

- Engineered 6+ Java-based pharmacy management features, including customer records, prescription refills, inventory tracking, and pricing management
- Designed automated receipt generation and record retrieval functionality to improve transaction efficiency

VOLUNTEER

Mosque Support & Event Assistance

April 2021 - Present

- Coordinated large community events while demonstrating leadership, teamwork, communication, and problem-solving skills under changing requirements

Academic Tutor

June - August 2025

- Mentored introductory C++ students through one-on-one support, strengthening technical communication and problem-solving abilities

WORK EXPERIENCE

Summer Intern, Islamic Society of Markham - Markham, ON

July - August 2024

- Coordinated community events through teamwork, communication, and organizational skills
